Merano
Specification
Sheet.

Blending solid wood bases with harmonious forms of pressed plywood.

The Merano armchair's iconic shape, comfort and workmanship have been attracting attention since 2010. It has now been adapted into a chair and a barstool.

The stackable chair can be accessorised with metal connectors for creating rows. Up to 14 smooth chairs can be stacked and transported on a cart.

The Merano collection is available in both smooth or fully upholstered options, or with an upholstered seat only.

Designed by Alexander Gufler.

Born in 1979 in the Italian spa town of Merano, Gufler started his career by following in his father's footsteps as a jeweller, and studying jewellery-making in the German city of Pforzheim. However, during his studies his interest began to turn in the direction of product design, which he then studied at the University of Applied Arts in Vienna.

Since 2010, he has run his own studio in the Austrian capital, where he works with local and international clients. His design work highlights detail, simplicity and an in-depth knowledge of the materials and manufacturing processes. Products he designed have been exhibited at a number of international exhibitions and awarded prizes in prestigious design competitions.
